I. SCENARIO

1.1 Problem Statements /Exercise:

Here's the problem statement or scenario for the exercise.

Using the synthetic 'Housing Dataset', which includes features such as id, location title, etc, can you develop a model that accurately predicts prices?

NB: [Use the notebook as a reference](#)

You will find the link to the dataset attached below.

[SIMPLE REGRESSION DATASET](#)

1. Click on the file tab
2. Click on create a copy

and download as a copy

2. NOTES & SPECIAL INSTRUCTIONS.

This section provides very important information you need to successfully run your lab. Strict adherence to these notes is very critical and important.

2.1 Delivery Method: TEAMS
